# 4K Interactive Touch Screen Whiteboard

A 4K interactive whiteboard for classrooms and meeting rooms. Ten-point touch, Android built in and annotation software included, with no projector, bulbs or calibration to worry about.

Product code **90207286** | Sizes **55" to 86"** | Touch **10-point infrared**

**4K UHD**
LED backlit, bright and shadow-free

**10-point**
infrared multi-touch, no calibration

**55" to 86"**
four screen sizes

**Android**
built in, with Google Play apps

## Overview

This all-in-one interactive display replaces the projector and whiteboard in a classroom, boardroom or training room. The 4K panel is LED backlit, so the picture is bright and sharp with no shadows, no bulbs to replace and no calibration: switch it on and start writing. Ten-point infrared touch lets several people work on the screen at once, through anti-glare etched glass.

Android is built in, with access to apps through Google Play. The included annotation software lets you write over images, videos, PDFs and documents, and share notes by email or QR code. Mirror a phone, tablet or laptop wirelessly, or plug in over HDMI, VGA or DisplayPort. An optional OPS PC slot adds Windows alongside Android.

## Key features

- **10-point infrared touch** for several users at once, no calibration
- **Anti-glare etched glass** for clear viewing from any angle
- **Annotation software** for images, video, PDFs and documents
- **Wireless screen mirroring** from phones, tablets and laptops
- **Optional OPS PC** for Windows and Android on one screen
- **Magnetic styluses** that store on the frame, plus a SmartPen

## Touch and annotation

**Write on anything.** Annotate over images, videos, PDFs and documents with a finger, stylus or SmartPen. Up to ten touch points work at once, so several people can use the board together.

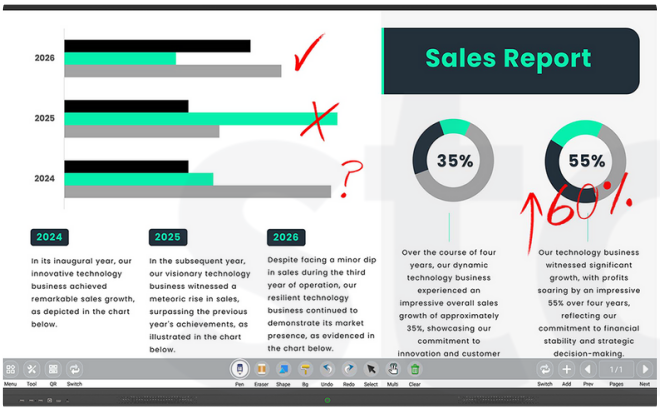

**Share the result.** Send meeting or lesson notes by email or QR code straight from the screen, and cut down on printing.

## Connecting devices

**Wireless.** Mirror a smartphone, tablet or laptop to the screen without cables.

**Wired.** Use HDMI with the USB touch cable to control a connected PC or Mac from the screen. Front HDMI and USB ports on most models make guest connections quick.

**Windows.** Add the optional OPS PC to run Windows alongside Android.

Wall mounted in a meeting room.
