CHECKOUT GATES

Alarmed Checkout Closer Gate – Deep Arm

A lockable, alarmed checkout closer that shuts off unmanned lanes so customers can only leave through a manned till.

Product code **26237215** | Arm **Deep**

Audible
alarm on push-through

40–80 Nm
adjustable panic force

180°
bi-directional

2 keys
lockable closer

Overview

Unmanned checkouts are a common route for shoplifting. This gate physically closes off cashier lanes when they are not in use, so customers can only exit through manned tills.

Once unlocked, the arm pivots in either direction and locks in the 90° position. If it is forced into panic mode without lifting the locking mechanism, an audible alarm sounds straight away to deter the exit and alert staff. The deep arm suits wider checkout aisles.

Key features

- **Lockable** checkout closer, supplied with 2 keys
- **Audible alarm** on unauthorised push-through
- **Adjustable panic force** from 40 to 80 Nm
- **Anti-panic release** for safe emergency exit
- **Manual arm reset** after panic release
- **Bi-directional** 180° operation

How it works

Lane closed. The gate is locked across the lane, so it cannot be used as an exit.

Lane open. Lift the locking mechanism and the arm pivots either way, locking in the 90° position.

Forced. If the arm is pushed into panic mode without lifting the lock, the alarm sounds. The arm is then reset by hand.

Why choose it?

It closes unmanned lanes without a member of staff standing at them, and the alarm alerts staff the moment someone tries to push through.

The anti-panic release still lets people out safely in an emergency, and the panic force can be set to suit your store.

Deep arm checkout closer with no-entry sign at a checkout lane.
