BOLLARD ACCESSORIES

Automatic Bollard Battery Back-Up

A battery back-up unit that keeps our automatic electromechanical bollards working when the mains power fails.

Product code **88005196** | For **Automatic bollards**

Back-up
during power cuts

Fail secure
keeps bollards up

2 models
standard and heavy duty

Enclosed
battery and charger

Overview

A battery back-up designed for our automatic electromechanical bollards and heavy duty automatic bollards. It keeps the bollards working during a power cut, so security and access control carry on when mains power is lost.

Without back-up, the bollards are fail safe and lower when the power goes. With it, they can stay raised (fail secure).

Key features

- **Keeps bollards working** during power cuts
- **Fail secure** operation
- **Battery and charger** in one enclosure
- **Made for** our automatic bollards

Product code	88005196
	Compatibility
Bollards	Automatic electromechanical bollard and heavy duty automatic electromechanical bollard
Function	Provides back-up power when mains power is unavailable
Power failure	Changes bollards from fail safe to fail secure
	Construction
Unit	Battery and charging board in an enclosure

store fittings direct

Why fit back-up?

Without back-up power, automatic bollards lower during a power cut so vehicles are not trapped. That leaves the site open.

For high security sites where continuous operation matters, the battery back-up keeps the bollards working.

Works with

Our automatic electromechanical bollard and heavy duty automatic electromechanical bollard.

Our automatic bollard control board.

For use with our automatic electromechanical bollards.
