BOLLARD ACCESSORIES

Automatic Bollard Control Board

A control panel that runs up to four of our electromechanical or hydraulic automatic bollards together.

Product code **95808128**

Bollards **Up to 4**

Up to 4
automatic bollards

230 V
single phase supply

2-channel
built-in radio receiver

-40°C
heater for cold weather

Overview

The control board for our automatic bollards. It operates up to four electromechanical or hydraulic automatic bollards in parallel, so a whole entrance rises and lowers together.

It has a built-in radio receiver for remote controls, digital programming with a display, and inputs for safety devices and access control.

Key features

- **Runs up to 4 bollards** in parallel
- **Built-in radio receiver** two channels
- **Digital programming** with 3-digit display
- **Automatic or semi-automatic** operation
- **Heater** for operation down to -40°C
- **UPS ready** for back-up power

What it does

The control board powers and controls your automatic bollards. It receives the signal from a remote, keypad, intercom or access control system and raises or lowers the bollards.

Safety devices such as photocells connect straight to it.

Works with

Our automatic electromechanical and heavy duty automatic bollards.

Our bollard traffic lights and battery back-up.

Controls our automatic bollards, up to four at a time.

Talk to someone who sells this every day

Tell us how many bollards you have and how you want to control them, and we will help you choose.
