ENTRANCE GATES

Bi-Directional Manual Swing Gate

A self-closing mechanical swing gate for shop entrances, exits and checkouts. Push it open in either direction and it swings gently back to closed.

Product code **37813922** | Swing **Bi-directional, 180°**

180°
bi-directional swing

650–1100
adjustable arm, mm

Self-closing
hydraulically cushioned

No power
fully mechanical

Overview

The self-closing gate you see at supermarket entrances and checkouts. It is a simple, reliable way to control which way people walk through your store or building: push it and it opens, let go and it swings gently back to closed.

There is no power or wiring needed, and the gate is built to take years of daily use with very little maintenance. Put one at an entrance and one at an exit, and customers naturally follow the route you have set.

Key features

- **Opens both ways** with a 180° swing
- **Hydraulically cushioned** return to the resting position
- **Anti-panic function** as standard
- **Adjustable arm** cut to size on site
- **Information sign** printed on both sides
- **Fully mechanical:** no power or wiring needed

Where it is used

Best known in supermarkets, swing gates work anywhere you want to guide people one way: shop entrances and exits, checkout and till areas, libraries, gyms and leisure centres, swimming pools, cinemas, office receptions and ticket checkpoints at events.

They also cut down on people walking out the wrong way past the tills.

Make it your own

The plastic infill can be customised with symbols and colours to match your branding, show direction arrows or display safety signs.

Because the gate closes itself, the walkway stays clear and is used the way you intended, without staff having to stand on the door.

Swing gates with direction arrow signs, set into a chrome barrier run.

Talk to someone who sells this every day

Tell us about your entrance, exit and checkout layout, and we will help you plan the gates and arms.
