CRASH TESTED BOLLARDS

Crash Tested Safety Bollard – 10 mph

A crash-tested safety bollard, certified to ASTM F3016 to stop a 5,000 lb pickup truck at 10 mph, for shop fronts, walkways and car parks.

Product code **40128858** | Cover **Plastic or stainless**

10 mph	2,268 kg	ASTM F3016	1016 mm
tested impact speed (16 km/h)	5,000 lb pickup truck	crash test standard	height above ground

Overview

A crash-tested safety bollard, tested at an independent third-party laboratory with a 5,000 lb (2,268 kg) pickup truck travelling at 10 mph (16 km/h). It protects shop fronts, entrances, walkways and people from vehicle impact.

It is more than a strong post: it is a complete, kitted safety system with a choice of covers to suit the look of your site.

Key features

- **Crash tested at 10 mph** with a 2,268 kg vehicle
- **ASTM F3016** certified
- **Supplied as a kit:** core, cover, rebar cage and fixings
- **Choice of covers:** plastic, with or without reflective strips, or stainless steel
- **Third-party crash tested** at an independent laboratory

Where it is used

Shop fronts, store entrances, walkways next to parking bays, drive-throughs and ATMs: anywhere a vehicle could mount the kerb at low speed.

For higher approach speeds, see our 15 mph and 20 mph crash tested bollards.

Choosing a cover

4" plastic cover (133 mm diameter) is the cost-effective choice, available plain or with reflective strips for extra visibility in car parks.

6" stainless steel cover (168 mm diameter) gives a premium finish for shop fronts and entrances.

Crash tested bollards with plastic covers outside a store.
