EV PROTECTION BOLLARDS

EV Charger Protection Bollard with Reflective Bands

A 108 mm steel or stainless steel bollard to protect EV charging points, with optional coloured reflective bands to match your charger.

Product code **86451323** | Diameter **108 mm**

108 mm
diameter

800 / 1200
heights, mm

4 colours
reflective band options

Stainless
or galvanised steel

Overview

Designed to protect EV charging points from accidental damage by vehicles. Optional retro-reflective bands in white, blue, green or red can be matched to your charging point, making the bollard highly visible day or night.

Made from high-quality galvanised steel or stainless steel with a sandblasted domed aluminium cap, it gives years of protection.

Key features

- **Steel or stainless steel** body
- **Domed aluminium cap** sandblasted
- **Reflective bands** white, blue, green or red (optional)
- **Surface or root fixed** options
- **White powder coat** option

Where it is used

Car park charging bays, workplace and retail charging hubs, fleet depots, hotels and forecourts.

Place a bollard either side of the charging unit, or in front of it, to stop a reversing vehicle reaching it.

Matching your charger

Choose a band colour to match the charging point branding or bay markings, so the bollards look like part of the charging bay.

Bollard dimensions in mm (800 mm surface fixed version).

Talk to someone who sells this every day

Tell us about your site and what you need to protect, and we will help you choose the right bollards.
