EV PROTECTION

EV Charging Protection Guard

A hot-dip galvanised 60 mm steel hoop guard with blue, green or red reflective rings, to protect EV chargers.

Product code **85422976** | Tube **60 mm**

500 / 800	360 / 500	60 mm	3
mm high	mm wide	steel tube	ring colours

Overview

This guard is designed to protect EV charging points from accidental damage by vehicles.

It is a cost-effective guard made from 60 mm steel tube, hot-dip galvanised for a long life, with 75 mm retro-reflective rings for visibility day and night.

Key features

- **Hot-dip galvanised** 60 mm steel tube
- **Reflective rings** blue, green or red
- **Two widths** 360 or 500 mm
- **Surface or root fixed** options
- **Cost effective** protection

Where it is used

EV charging bays in car parks, workplaces, retail parks, hotels, depots and forecourts.

Root fixed or surface mounted?

Root fixed guards are concreted into the ground, the strongest option for new paving.

Surface mounted guards bolt down onto an existing concrete base.
