PROTECTION BOLLARDS

Flexible Impact Protection Bollard

A shock-absorbing thermoplastic polyurethane bollard that looks like steel but flexes on impact and springs back.

Product code **64644832**

Colour **Yellow/black or red/white**

1000 mm	Ø80 mm	TPU	Flexes
height	bollard	corrosion free	and springs back

Overview

A collision-absorbing bollard moulded from thermoplastic polyurethane (TPU). It has the classic shape of a steel bollard, but when it is hit its flexibility becomes apparent.

It absorbs the impact, protecting vehicles, the floor and the bollard itself, and returns to shape. It will not corrode.

Key features

- **Thermoplastic polyurethane** flexible and strong
- **Shock absorbing** protects vehicles and floors
- **Corrosion free**
- **Steel bollard look** classic shape
- **Two colourways** yellow/black or red/white

Where it is used

Warehouses, car parks, loading areas and pedestrian routes where bollards are hit often.

Why flexible?

A flexible bollard bends when it is hit and springs back to its upright position, so it survives repeat impacts and does less damage to vehicles than a rigid post.

Red and white version.
