KEEP LEFT BOLLARDS

Flexible Keep Left Bollard – Recycled Rubber

An impact-recovery keep left bollard in recycled rubber that vehicles can strike without damaging it.

Product code **72912002** | Height **980 mm**

980 mm	320 mm	Recycled	Rebounds
height	max width	rubber	after impact

Overview

A low-energy-absorption keep left bollard for highway and non-highway use. Its rebound design marks hazards and lets vehicles strike it without damage to the bollard.

Key features

- **Impact recovery** rebounds after a strike
- **Recycled rubber**
- **Keep left sign**
- **Bolt-down base** pre-drilled

Where it is used

Traffic islands, pedestrian refuges, central reserves, junctions and car park lanes on highways and private roads.

Why flexible?

A flexible bollard bends when it is hit and springs back to its upright position, so it survives repeat impacts and does less damage to vehicles than a rigid post.

Flexible keep left bollard on a traffic island.
