A steel hoop barrier that keeps vehicles off forecourts, paths and planted areas while looking neat and leaving clear views. It is a popular choice for car dealerships, as it protects the forecourt but still allows easy access.

Hoops can also be used as cycle and motorcycle loops, to mark out trolley bays, and as doorway or wall protectors. Each barrier is made to order in the UK.

Where it is used

Car showroom forecourts, building fronts, trolley bays, cycle and motorcycle parking, walkways and landscaped areas.

Root fixed or surface mounted?

Root fixed posts are concreted into the ground, the strongest and most permanent option.

Surface mounted posts bolt down onto an existing concrete base, and can be moved later if needed.
