STEEL BOLLARDS

Galvanised Steel Bollard – 1200 mm Above Ground

A galvanised steel bollard standing 1200 mm above ground, in 9 diameters from 48 to 219 mm.

Product code **29928697** | Height **1200 mm above ground**

1200 mm	48–219	Galvanised	2 fixings
above ground	diameters, mm	mild steel	root fixed or base plated

Overview

A fixed steel bollard, 1200 mm above ground, that adds clear, visible security to car parks, walkways and building fronts. Steel is exceptionally strong and will not shatter on impact, so it is ideal for ram raid deterrence, protected parking and pedestrian areas.

Each bollard is made from round mild steel tube with a welded steel cap. Choose extended legs for concreting in, or a flange plate for bolting down onto an existing surface. It matches our removable and telescopic posts, so you can mix fixed and removable bollards along one run.

Key features

- **Galvanised mild steel** for long life outdoors
- **9 diameters** from 48 mm to 219 mm
- **Welded steel cap** for a neat, sealed top
- **Root fixed or base plated** options
- **Made to measure** heights, colours and diameters on request

Where it is used

Car parks, pedestrian walkways, shop fronts, building entrances and perimeters where vehicles need keeping back.

Steel bollards deter ram raids and protect parking bays, cash machines and glazing.

Root fixed or base plated?

Root fixed bollards have extended legs that are concreted into the ground, the strongest option for new groundworks.

Base plated bollards bolt down onto an existing concrete surface with a flange plate, which suits sites where you cannot dig.

Galvanised steel bollards protecting a building front.
