WAREHOUSE BARRIERS

# Hybrid Protection Barrier – Individual

A steel post and polypropylene rail barrier, 1000 mm high and 1 to 2 m long, with an optional flexing PU pad, for indoor walkways.

Product code **49398140** | Height **1000 mm**

| 1000 mm | 1–2 m | 3 | Flex |
|---|---|---|---|
| high | lengths | PP rails | pad option |

## Overview

A protection barrier for small, vulnerable areas in the workplace, such as walkways, entrances and exits. Two steel posts carry three polypropylene rails that absorb impact forces.

Choose rigid posts, or posts on polyurethane pads that let the barrier flex by up to 175 mm. The flexing version passes less force into the floor, which reduces repair costs.

## Key features

- **Steel posts** powder coated black
- **Polypropylene rails** yellow, absorb impacts
- **Flex pad option** deflects up to 175 mm
- **Three lengths** 1000, 1500 or 2000 mm
- **Indoor use** walkways and entrances

## Where it is used

Warehouses, factories, distribution centres and loading areas, to separate forklifts and vehicles from people, racking, machinery and buildings.

## Rigid or flexing?

The **rigid** version absorbs impacts in the rails. The **flexing** version also lets the posts move on PU pads, so less force reaches the floor.

## Specification

| Product code | 49398140 |
|---|---|
| **Posts** | |
| Rigid posts | 1000 × 100 × 100 mm |
| Flex posts | 1040 × 100 × 100 mm |
| Wall thickness | 3 mm |
| Base plate | 200 × 200 × 10 mm |
| Finish | Powder coated black |
| **Rails** | |
| Material | Polypropylene (PP), yellow |
| Section | 74 × 52 mm, 5 mm wall |
| Lengths | 1100, 1600 or 2100 mm |
| **Flex pad** | |
| Material | Polyurethane (PU), black |
| Size | 206 × 206 × 50 mm |

Protecting a workstation.
