Which bollards need it?

Our fixed bollards with LED crown, our high security fixed bollards and our 500 mm and 700 mm manual gas rising bollards.

Automatic bollards are powered by the control board instead.

Why light the crown?

A lit crown makes bollards easy to see in low light, improving safety for drivers and pedestrians and clearly marking restricted areas.

LED light crown on a manual gas rising bollard.

Talk to someone who sells this every day

Tell us how many bollards you are lighting, and we will help you work out what you need.
