lifts out of socket	grade stainless steel	diameters, mm	secures in place

Overview

A simple, elegant bollard for stopping unauthorised vehicle access or parking in communal areas. It lifts out of its ground socket when you need to let vehicles through.

Made from 304-grade stainless steel as standard, it keeps its appearance with very little upkeep and suits prestigious sites.

Key features

- **Removable** from a ground socket
- **304 stainless steel** as standard
- **Mitre top** with welded cap
- **9 diameters** from 60 mm to 168 mm
- **Padlock secured** padlock sold separately

How it works

The bollard sits in a socket set in the ground and is locked in place with a padlock.

Unlock it and lift it out to open the space; drop it back in and lock it to close it again.

Where it is used

Communal parking, private roads, emergency access routes and service areas that need to be opened from time to time.

Matches our fixed mitre top stainless steel bollard.

Removable mitre top bollard with its ground socket.
