KEEP LEFT BOLLARDS

One-Piece Flexible Keep Left Bollard

A one-piece flexible keep left bollard that fuses a flexible base to a rigid sign carrier, for highway and non-highway use.

Product code **68383097**

Sign **Single or double sided**

One-piece
fused construction

Flexible
base

Reflectors
single or double

Signs
610 and 611 options

Overview

A low-energy-absorption keep left bollard for highway and non-highway use. Its one-piece construction fuses two different materials during manufacture, giving a stronger, longer-lasting bollard.

Key features

- **One-piece construction** flexible base fused to sign carrier
- **Flexible** recovers after impact
- **Single or double sided** signs
- **Fluorescent reflectors** single or double
- **Sign options** keep left, keep right, dual arrows

Where it is used

Traffic islands, pedestrian refuges, central reserves, junctions and car park lanes on highways and private roads.

Why flexible?

A flexible bollard bends when it is hit and springs back to its upright position, so it survives repeat impacts and does less damage to vehicles than a rigid post.

Flexible keep left bollard on a traffic island.
