TIMBER CARE

Postsaver Ground Line Sleeves – Square, 10 Pack

Heat-shrink sleeves that protect square timber posts at ground level, where rot starts, in a pack of 10.

Product code **269230115**

Pack **10 sleeves**

10	3	Heat	Bitumen
per pack	sizes	shrink	lined

Overview

Timber posts usually rot at the ground line, where wood, air and moisture meet. Postsaver sleeves seal this zone to help posts last far longer.

Each sleeve has a bitumen lining and is heat-shrunk onto the post, forming a tight, waterproof barrier around the section that sits at ground level.

Key features

- **Seals the ground line** where rot starts
- **Bitumen lined** waterproof seal
- **Heat shrink** tight fit to the post
- **Three sizes** for square posts
- **Pack of 10** sleeves

Where it is used

Fence posts, gate posts, timber bollards, pergolas, signposts and any square timber post set into the ground.

How it works

The sleeve is positioned to straddle the ground line, then heated so it shrinks and the bitumen bonds to the timber.
