WHEEL STOPS

Recycled Rubber Car Park Wheel Stop

A recycled rubber wheel stop with reflective panels, 550 to 1800 mm long, supplied with fixings, to stop cars rolling too far.

Product code **50434620** | Lengths **550–1800 mm**

550–1800	150 mm	100 mm	Fixings
lengths, mm	wide	high	included

Overview

Wheel stops stop vehicles rolling too far into a parking space. They protect walls, glass shop fronts, fencing, EV chargers, planting and the cars themselves.

They are made from highly compressed recycled rubber that resists oil, heat and UV, with reflective panels visible from all sides. They come with fixings and bolt hole covers.

Key features

- **Recycled rubber** highly compressed
- **Reflective panels** visible from all sides
- **Oil, heat and UV** resistant
- **Four lengths** 550 to 1800 mm
- **Fixings** included

Where it is used

Car parks, retail parks, showrooms, EV charging bays, warehouses and loading yards. They can also separate cycle lanes and footpaths from vehicles.

How many per space?

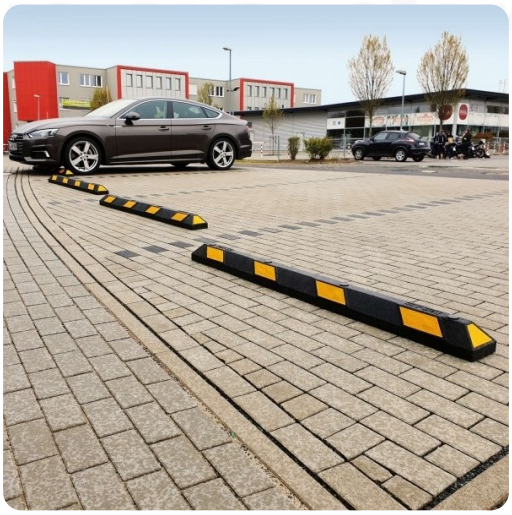

The **550** and **900 mm** stops are used in pairs, one per wheel. The **1800 mm** stop runs across the full width of a car, so one is enough.
