CRASH TESTED BOLLARDS

Removable Crash Tested Safety Bollard – 10 mph

A removable 10 mph crash-tested bollard, certified to ASTM F3016, that lifts out when you need vehicle access.

Product code **95134281** | Type **Removable, locking**

10 mph	2,268 kg	ASTM F3016	1016 mm
tested impact speed (16 km/h)	5,000 lb pickup truck	crash test standard	height above ground

Overview

A crash-tested safety bollard, tested at an independent third-party laboratory with a 5,000 lb (2,268 kg) pickup truck travelling at 10 mph (16 km/h). It protects shop fronts, entrances, walkways and people from vehicle impact.

It is more than a strong post: it is a complete, kitted safety system with a choice of covers to suit the look of your site.

Key features

- **Crash tested at 10 mph** with a 2,268 kg vehicle
- **ASTM F3016** certified
- **Removable** with a secure locking design
- **Supplied as a kit:** core, cover, rebar cage and fixings
- **Choice of covers:** plastic, with or without reflective strips, or stainless steel
- **Third-party crash tested** at an independent laboratory

Why removable?

Some access points need protecting most of the time but opening now and then, for deliveries, maintenance or emergency vehicles.

A removable bollard gives crash-tested protection day to day, and can be unlocked and lifted out when access is needed.

Choosing a cover

4" plastic cover (133 mm diameter) is the cost-effective choice, available plain or with reflective strips for extra visibility in car parks.

6" stainless steel cover (168 mm diameter) gives a premium finish for shop fronts and entrances.

Third-party crash test of a 10 mph rated bollard.
