

# SSTS 4000 Full Height Turnstile

The SSTS 4000 Full Height Turnstile is designed and manufactured to the highest specification using top quality components and materials offering rugged reliability and durability for any solution whether controlling pedestrian traffic, incorporated as part of a perimeter system enhancing security or retrofitted into an existing fence line. The SSTS 4000 is also suitable for internal applications where ceiling height is an issue.

Available as a single or double turnstile configuration in a choice of three models, SSTS 4000P, 4000G and 4000GP it is widely recognised within the industry as the best in class' and the ideal solution for controlling pedestrian access providing a secure perimeter environment with the ability to monitor staff movement for purposes of time and attendance or health and safety.

The SSTS 4000 is smooth and quiet during operation and being 100% Duty Cycle Rated offers continuous operation for heavy foot traffic.

We offer a complete turnkey solution from design to handover along with a comprehensive after sales support to meet your immediate and long term needs.

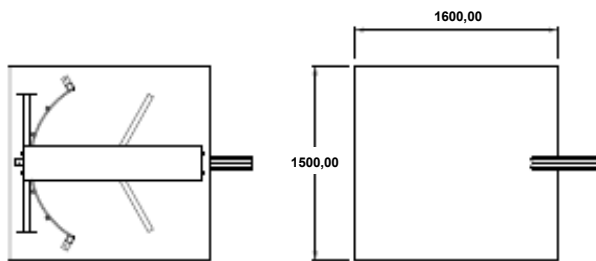

SSTS 4000P/G/GP Full Height Turnstile
