SWING BARRIER GATES

Single Leaf Manual Swing Barrier Gate

A strong steel swing gate, 3 to 6 m wide, with a self-locking catch, for closing off roads, car parks, tracks and site entrances.

Product code **92078982** | Widths **3 m to 6 m**

3–6 m widths

1000 mm high

Self-locking catch

Made to your width

Overview

A simple, strong steel gate for closing off roads, car parks, farm tracks, yards and site entrances. It swings open by hand, and a self-locking catch holds it shut. Add a padlock and it is secured.

It is a low-cost choice for unmanned sites and low-traffic entrances, where an automatic barrier would be more than you need. Each gate is made to order to your exact width.

Key features

- **Steel box section** 50 × 3 mm gate frame
- **Self-locking catch** galvanised, with padlock facility
- **Adjustable eyebolts** heavy duty hinges
- **Three finishes** powder coated, galvanised or both
- **Made to order** to your exact width

Where it is used

Roads, car parks, farm tracks, yards and site entrances, especially unmanned sites with low traffic.

Add the latch post if the gate will be left open for long periods, so it cannot swing shut in the wind or across traffic.

Which finish?

Powder coated gives a choice of 7 colours, including high-visibility yellow and red.

Galvanised gives the best protection against rust, for rural, exposed or coastal sites.

Galvanised and powder coated combines rust protection with a coloured finish, for the longest life.
