ARM BARRIERS

Solar Powered Automatic Arm Barrier

A compact automatic arm barrier powered by solar and an internal battery, so no mains supply is needed. Supplied with a remote fob.

Product code **36723187** | Drive-through **1500 to 2500 mm**

Solar
and battery

1.5–2.5 m
drive-through

No mains
supply needed

Remote
fob supplied

Overview

A reliable automatic barrier for small to medium entrances such as private estates, car parks and building entrances. It is powered by an internal battery topped up by solar power, so there is no need for an outside electrical supply.

The unit comes pre-assembled and surface mounts. The all-aluminium boom has red reflective strips for high visibility, and a manual override lets you raise it in an emergency.

Key features

- **Solar and battery powered** no mains needed
- **All aluminium** construction
- **Reflective boom** red and white
- **Manual override** for emergencies
- **Remote fob** supplied

Where it is used

Private estate entrances, car parks, building entrances, small business sites and anywhere without a mains supply at the gate.

Why solar?

There is no cable to run to the barrier, so it suits entrances a long way from a power supply, and it keeps working without running costs.
