PARKING POSTS

Sprung Parking Bay Boundary Post

A sprung steel post that marks parking bay boundaries, bends up to 30° on low-speed impact and returns upright.

Product code **32431061** | Height **750 mm**

750 mm	Ø48 mm	30°	3 finishes
above ground	tube	flex from upright	galvanised, yellow or black

Overview

A post made to mark the boundaries of parking spaces. A spring built into its base absorbs low-speed knocks and returns the post to upright.

It bends up to 30° from vertical, so it survives bumps from careful drivers without damaging cars.

Key features

- **Spring base** absorbs low-speed impacts
- **Bends up to 30°** and returns upright
- **Galvanised** or galvanised and coated
- **Concrete in or bolt down** options

Where it is used

Marking parking bays, disabled and reserved spaces, and the edges of car parks and service areas.

Why flexible?

A flexible bollard bends when it is hit and springs back to its upright position, so it survives repeat impacts and does less damage to vehicles than a rigid post.

Yellow sprung post marking a parking bay.
