diameters, mm

2 fixings
root fixed or base plated

Overview

A stainless steel bollard with a semi-domed top that adds clear security while looking smart. Steel is very strong and will not shatter on impact, so it suits ram raid deterrence, protected parking and pedestrian walkways.

Made from 304-grade brushed stainless steel, it resists corrosion and keeps its appearance with very little upkeep. It is a favourite with architects and planners for shop fronts, offices and public spaces, and it matches our telescopic and removable posts.

Key features

- **304 stainless steel** brushed finish
- **Semi-domed top** for a distinctive profile
- **11 diameters** from 48 mm to 204 mm
- **Corrosion resistant** with minimal upkeep
- **Root fixed or base plated** options

Where it is used

Shop fronts, office entrances, public squares, car parks and pedestrian walkways where appearance matters as much as protection.

Mix with our stainless steel removable and telescopic posts for areas that need occasional access.

Root fixed or base plated?

Root fixed bollards are concreted into the ground, the strongest option for new groundworks.

Base plated bollards bolt down onto an existing concrete surface with a flange plate, which suits sites where you cannot dig.

Brushed stainless steel bollards on a paved walkway.
