PEDESTRIAN BARRIERS

Water Filled Barrier Separator

A red or white HDPE barrier that weighs 5.5 kg empty and 27.5 kg when filled with water, for separating traffic and pedestrians.

Product code **69980361** | Weight **5.5 kg empty, 27.5 kg filled**

5.5 kg	27.5 kg	HDPE	Reflective
empty	filled	recyclable	panels

Overview

A water-filled barrier that makes a bold, eye-catching separator between traffic and pedestrian routes. It is light enough to carry into place empty, then filled with water to its working weight.

An anti-overfill feature and anti-trip design make it safer for pedestrians. Barriers link together with S clips and can be placed back to back over exposed manholes. Reflective red and white panels keep it visible in most light.

Key features

- **Fill with water** 5.5 kg empty, 27.5 kg filled
- **Links together** with S clips
- **Reflective panels** red and white
- **Anti-trip** and anti-overfill
- **Fully recyclable** HDPE

Where it is used

Forecourts, lift and access way closures, entrances and exits, hazardous areas and pedestrian routes beside traffic.

Why water filled?

It is quick to move and set up while empty, then the water gives it the weight to stay put. Empty it again to move or store it.
