A COST EFFECTIVE OPS SOLUTION

Performance meets Value – The Cherry Trail Intel® Atom™ Processor provides 50% more computing power than its predecessor, has the lowest power consumption in the class and is incredible value for money.

Flexible Working – Its unique architecture supports a wide range of different operating systems like Windows 8, Windows 10 or even Linux to suit your way of working.

Intel HD Graphics – Experience a remarkable HD resolution, with faster frame rates and outstanding visual details for video playback thanks to the Intel® 8th generation integrated graphic card.

Fully Embedded Solution – All the connectors are contained within the display including power and both video and audio signals so no external cables are required.

Quality Commitment – Built with industrial grade components you can be confident in the reliability of our product and so offer a 5 year warranty* on the OPS computer.

Economical – Utilise a higher performance level while consuming less power.

Upgrade your PC at any time – Upgrade your PC at any time by simply swapping out the Economical OPS Slot-in PC for our more powerful Premium version; without having to change your entire display hardware.

*This product has a 5 year warranty when purchased with the Interactive Touch Display with MeetingPad otherwise a 3 year warranty is applied otherwise.
